医用压敏胶带

Medical Pressure Sensitive Adhesive Tape

PRODUCT INTRODUCTION

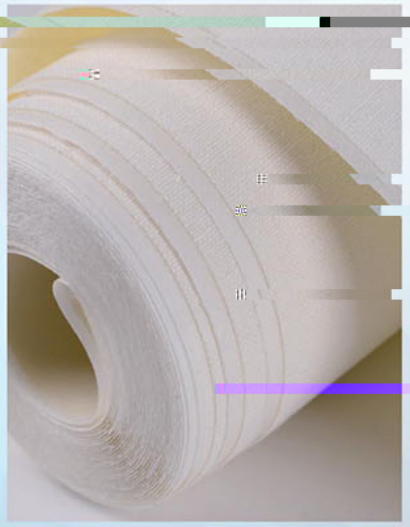

产品介绍

一种特殊类型的胶带，将一种特殊胶粘剂(压敏胶)涂于带状基材上制成。由压敏胶、基材、底胶、背面处理剂等构成。压敏胶是压敏胶带最重要的组成部分。其作用是使胶带具有对压力敏感粘附特性。用作基材的主要有织物、塑料薄膜、纸类等。底胶是增加压敏胶与基材的粘结强度。使用时轻轻加压使胶带与被粘物表面粘结。

A special type of tape made by coating a special adhesive (pressure sensitive adhesive) on a strip substrate. It is composed of pressure-sensitive adhesive, base material, primer and back treatment agent. Pressure sensitive adhesive is the most important part of pressure-sensitive adhesive tape. It is to make the adhesive tape sensitive to pressure. The main substrates used are fabrics, plastic films, paper and so on. Primer is to increase the bonding strength between pressure sensitive adhesive and substrate. When using, press gently to make the adhesive tape adhere to the surface of the object to be adhered
